MICROPLAN FOR N.CHALTLANG VFDC (GIM)L3 UNDER KAWNPUI & BUKPUI L2 LANDSCAPE (GREEN INDIA MISSION)

PLAN PERIOD: 2016-17 TO 2022-23

Prepared by

KOLASIB FOREST DIVELOPMENT AGENCY
KOLASIB: MIZORAM

INDEX

Chapter	1	Indroduction, scope and objective	3-12
Chapter	2	Details of Identified Landscape	13-27
Chapter	3	Process Undertaken for preparation of Micro-plan sub- Landscape plan	28-31
Chapter	4	Activities Proposed to be Undertaken	32-40
Chapter	5	Activities proposed under convergence	41-42
Chapter	6	Institutional set up for implementation in the Landscape	43-44
Chapter	7	Livelihood issue	45-47
Chapter	8	Baseline Survey	48-51
Chapter	9	Status of Reform Proposed	52-53
Chapter	10	Mission cost	54-55

Annextures:

- 1 Map of L1 landscape (Mizoram)
- Govt. Notification for constitution of SDFA, State & District level steering com. FDA(GIM), and Village level Com. For Green India Mission.
- 3 Minutes of Meeting(State Mission Directorate GIM)
- 4 Minutes of meeting of District level steering Com. On GIM. Kolasib District
- 5 Minutes of meeting of village level committee on Green India Mission.
- Approval of District level steering com on GIM for convergence proposal of the perspective plan for Kolasib District
- 7 Approval of Microplan by Administrative head of L3 village
- 8 Works Detail for L3 Landscape
- 9 Baseline data: a) Shannon diversity indexb) Carbon stock Estimation.
- 10 Maps of L2 Landscapes
- 11 Maps of L3 Landscapes

Chapter 1

Introduction, Scope and Objectives

1.1 About the State (Landscape - L1)

1.1.1 Introduction

Mizoram was earlier a part of the British India since 1895. In 1898, the district called "Lushai Hills" was created with Aizawl as its headquarter. After independence in 1947, the district was renamed as "Mizo District" and also the autonomous Mizo District Council was established on 25th April, 1952. Subsequently, Mizoram was made a Union Territory in 1972 and finally, it became the 23rd State of India on 20th February, 1987.

1.1.2 Location, Extent and Topography

Mizoram, which is one of the Seven Sister States in the North-Eastern India, is located between 21°56` and 24°35` N Latitude and 92°16` and 93°26`E Longitude. It shares the boundary with Assam and Manipur on the North, Myanmar on the East and the South, and Tripura and Bangladesh on the West. The long international boundary (about 630 miles) of Mizoram with Myanmar and Bangladesh makes it strategically located.

The geographical area of the State is 21,087 sq. km. with mostly hilly terrains. Most of the hills have moderate to steep slopes and are separated by rivers flowing either to the North or South direction. These rivers have created deep gorges between several hill ranges. In fact, Mizoram is "a land of rolling hills, valleys, rivers, and lakes" (Environment & Forest Department, 2010, p.5). The plains occupy comparatively a very small portion of the total geographical area and are mostly located at places such as Champhai, North Vanlaiphai etc. on the eastern part of the State.

1.1.3 Climate

The whole of Mizoram enjoys a pleasant climate with cool summer and moderate winter. The temperature varies from 11°C to 21°C during winter and 18°C to 29°C in summer. The State gets rainfall from both the North-East and the South-West Monsoon. It receives heavy rains from May to September. The average annual rainfall is about 254 cm. As such, the climate in Mizoram is conducive to conservation and sustainable development of forests.

1.1.4 Soil

The soil in Mizoram, in general, is fertile and rich in organic contents. However, the soil depth is found less at few places, particularly at very steep slopes, due to the effect of heavy run-off in degraded forests. The contents of potash and phosphorus in the soil are low, whereas the content of nitrogen is normally high because of the accumulation of organic matters over the years. The fertile soil is generally found at

low to moderate slopes, on river banks and in the valleys. The soil at such places is responsive to the vigorous and healthy growth of the forests and thus supports rich biodiversity.

1.1.5 Demography

The population of the State was 10,91,014 as per 2011 census, of which 5,52,339 (51 percent) are male and 5,38,765 (49 percent) are female. The population density has increased from 33 to 52 persons per sq. km. during the decade, 1999 - 2011. Most of the people in the State belong to several culturally-linked ethnic tribes which are collectively called "Mizos" (Mi: People, Zo: Hill). These people are highly educated. Mizoram has a literacy rate of 91.58 %, which ranks it second among States in India. "Mizo" and "English" are the main languages spoken by the majority of the people.

1.1.6 Socio-economic life of the people

Since signing the "Peace Accord" on 30th June 2006, the State has effectively implemented several developmental schemes. Peace and development have resulted into comparatively better Human Development Index (HDI). The HDI in Mizoram was found 0.67, the highest among the north-eastern States and more than the national average (Government of Tripura, 2007, p.28).

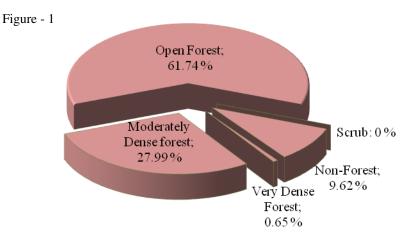

Agriculture is the dominant source of income and employment for the people in Mizoram. As per 2001 census, 61 percent of the working population in the State was dependent on agriculture. In rural areas, most of the people are engaged in "Jhumming" (shifting cultivation). 89,454 households, 57.85 percent of total 1,54,643 households, were cultivators and further, 78,195 households, 87 percent of all cultivator households, were practicing shifting cultivation (Government of Mizoram, 2004, p.17). The "Jhumming" practice has adversely affected the rich forest cover of the State. Planned efforts are now being made to control and transform the practice of shifting cultivation into settled agriculture. Technical and financial assistance is being given to the rural people enabling them to leave the practice of shifting cultivation and get engaged in other sustainable livelihood activities such as horticulture, piggery, settled cultivation etc.

1.2 The forests in Mizoram

1.2.1 Forest cover

A large area - 19,277 sq. kms. (91.44 percent of the State's total geographical area) - is covered under forests i.e. Forest and Tree cover (Forest Survey of India, 2013). However, the forests have suffered serious depletion and degradation due to the traditional practice of shifting cultivation, uncontrolled fire, unregulated felling etc. As per the "India State of Forest Report 2013" published by the Forest Survey of India, the State has 13,016 sq. kms. open forests which is 67.70 % of the total forest cover and 61.74 % of

the total geographical area. The density-class of forests found in the State has been shown below graphically in Figure 1.

Source: Forest Survey of India, 2013

1.2.2 Forest types

The forests in Mizoram are very rich in biodiversity. As many as 6 important forest types have been reported to occur in the state (Forest Survey of India, 2011). These are:-

- Cachar Tropical Semi-Evergreen Forest (2B/C2): Mostly found in all districts of the State.

 The important species are *Dipterocarpusturbinatus*, *D. tuberculatus*, *Terminaliachebula*, *Emblicaspp*, *Careyaarborea etc*.
- **Secondary Moist Bamboo Brakes (2/2S1):** Dominant species of bamboo like *Melocannabambusoides, Dendrocalamushamiltonii etc.* are present.
- **Pioneer Euphorbiaceous Scrub** (2B/2S1): It is generally found in degraded forests and exposed lands present on higher slopes and on top of the hills. It has quick growing species like *Macaranga* spp., *Mallotus* spp. etc. This type is found in all districts except Kolasib.
- East Himalayan Moist Mixed Deciduous Forest (3C/C3b): Schimawallichii, Syzigiumcuminii, Albizziaprocera, Dilleniapentagyna, Artocarpuslakoocha, Terminaliaballerica, T. chebula, Lagerstroemia parviflora, Anthocephalouskadamba etc. are the characteristic species of this type. It is found in all districts of Mizoram.
- East Himalayan Subtropical Wet Hill Forest (8B/C1): Major characteristic species are Quercusvercus, Q. serrata, Castanopsisspp, Litsea spp. Machilusspp etc. This forest type is found in Kolasib district.

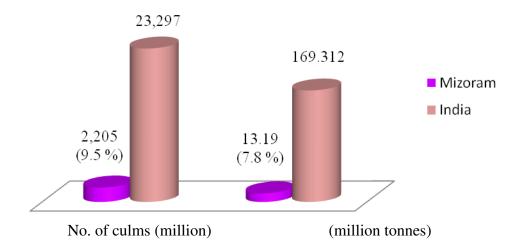

• Assam Subtropical Pine Forest (9/C2): It is mostly dominated by the species *Pinus kesiya* with other associates like *Quercus*spp, *Schimawallichii*, *Rhododendron*spp etc. This forest type is found mainly in Champhai district of the State.

1.2.3 Bamboo Resources

Nature has endowed Mizoram with valuable Bamboo Forests. Bamboos - Green Gold for the State - are one of the most important natural resources which provide immense economic and environmental benefits for the local people. Bamboos are used for multiple purposes as the culms are straight and strong but light. These are used extensively in house construction particularly in the rural areas, as food, and for making various household items such as stools, benches, kitchen utensils, agricultural implements, and fishing devices. Further, bamboo acts as an effective soil binder protecting the slopes from erosion through its deep and extensive root system.

Bamboos are found abundantly in the State mainly along river banks and on abandoned jhumland. Both the clump forming and the non-clump forming species occur naturally in most parts of the State except on the higher altitudes of its eastern region. A large area of about 9,245 sq. kms., which is 44 percent of the State's geographical area, is covered under "Bamboo Forests" (Forest Survey of India, 2011, p.61). In spite of being small in size, Mizoram contributes significantly to the country's growing stock of bamboos.

Bamboo resources of the country have been assessed by the Forest Survey of India (FSI), Dehradun. As per the India State of Forest Report 2011 (Chapter 6) published by the FSI, total number of culms in recorded forests of Mizoram has been estimated to be 2,205 million as against 23,297 million estimated at the national level. Similarly, the total estimated green weight of bamboo culms has been estimated to be 13,187,000 tonnes for the recorded forests of Mizoram as against 1, 69,312,000 tonnes for the whole country. The growing stock of bamboos in recorded forests of Mizoram as against the same for the whole country has been shown below graphically.

Area under "pure bamboo brakes" in Mizoram was found the highest among all the States/Union Territories of the country (226 sq.kms.). The dense bamboo forests also cover a large area in the State of Mizoram. The dense bamboo across all the States was found maximum in Arunachal Pradesh (8,681 sq. kms.) followed by Mizoram (6,116 sq.kms.).

The bamboo forests in Mizoram are also rich in bio-diversity. 35 species of bamboos under 9 genera have been reported to grow in the State (E & F Department, 2010). *Melocanna baccifera* (locally called "Mautak"), a non-clump forming species, is the prominent species found in the State. Other dominant species are *Dendrocalamus hamiltonii* (Phulrua), *D. longispathus* (Rawnal), *Bambusa tulda* (Rawthing), *B. longispiculata* (Rawthing chi), and *Arundinaria callosa* (Phar). These species do not occur in large proportions like Mautak but are commercially valuable.

1.2.4 Areas under Notified Forests in the State

The notified forests include (1) Riverine Reserve Forests (1832.50 sq.kms), (2) Innerline Reserved Forests (570 sq. kms.), (3) Roadside Reserve Forests (97.20 sq.kms.), (4) Other Reserve Forests (1963.63 sq. kms.) and (5) Protected Areas (1240.75 sq.kms) under the ownership of the State Government as well as 2562 sq. kms. under the ownership of District Councils. Thus, about 39 percent of the total geographical area (8266.08 sq.kms.) is covered under "notified forests" in the State of Mizoram.

1.2.5 Protected Areas

The Environment and Forest Department, Govt. of Mizoram has taken praiseworthy initiatives for preservation of wildlife by constituting one Tiger Reserve, two National Parks and seven Wildlife Sanctuaries. These are (1) Dampa Tiger Reserve, (2) Murlen National Park, (3) Phawngpui National Park, (4) Ngengpui Wildlife Sanctuary, (5) Lengteng Wildlife Sanctuary, (6) Khawnglung Wildlife Sanctuary,

(7) Tawi Wildlife Sanctuary, (8) Thorangtlang Wildlife Sanctuary, (9) Pualreng Wildlife Sanctuary, and (10) Tokalo Wildlife Sanctuary. The area set aside for long-term wildlife conservation is 1728.75 sq. km. which is more than 8 % of the State's geographical area.

The network of protected areas provides healthy habitats for many wild animals, birds, and reptiles. Some important species of mammals found in the State are Tiger, Elephant, Malayan Sun Bear, Wild dog, Brush Tailed Porcupine, Gour, Leopard Cat, Marbled Cat, Golden Cat, Clouded Leopard, Serow etc. The forests of Mizoram also provide habitats for primates such as Assamese Macague, phyare Leaf Monkey, Slow Loris, Pig Tailed Macaque, Stump Tailed Macaque, Rhasus Macaque, and Capped Langur and also for Hoolock Gibbon, the only ape found in India.

Important bird species found in the State are Black Stork, Oriental Darter, Serpent Eagle, Black Eagle, Humes Bartailed Pheasant, Blyth's Tragopan, Green Burmese Peafawl, Grey Peacock, Fufous Patridge, Brushed Patridge, Yellow-legged Button quill etc. The Hornbill species include Great Indian Hornbill, Wreathed Hornbill, Oriental Pied Hornbill, Brown Hornbill, and Rufous-necked Hornbill.

1.3 Bio-geographical importance

The forests in Mizoram are ecologically significant as the region represents an important part of the Indo Myanmar bio-diversity hotspot which is one of the 25 global biodiversity hotspots recognized across the globe. Several hot-spots in the State carrying diverse flora and fauna have been identified for protection. Further, the region is part of biologically distinctive eco-system (Mizoram-Manipur-Kachin Rainforests Eco-region). As such, conservation of the forests in the State is a necessity for arresting the progress of climate change and mitigating the impact of changing climate on the people.

1.4 Expectations of people from the forests

1.4.1 People's Participation in Conservation of the Forests

The State of Mizoram moved from State regulation to people's participation for managing its rich forest wealth by adopting the "Joint Forest Management" (JFM) through a notification issued in 1998. The introduction of JFM established a new mutually-beneficial relationship between the forests, the people and the State. The basic objective for adopting the mechanism of JFM in the State was to encourage active involvement of the local people in enrichment, protection and sustainable management of the forests.

It was envisaged to impart sense of ownership over the forest areas covered under JFM to the villagers. Guidelines for managing the forests with people's participation were framed. As per these guidelines, the local people participating in managing the forests and the State would share the forest

produce, which may be extracted from the areas covered under JFM by applying scientific principles of sustainable management.

The organizational structure for managing the forests with constructive participation of the local people, at present, consisted of three levels in the State i.e. (1) State Forest Development Agency (SFDA) at the State level, (2) Forest Development Agencies (FDAs) at the divisional level, and (3) Village Forest Development Committees (VFDCs) at the village level. Eco-Development Committees (EDCs) have been constituted for the villages located near the protected areas. The existing guidelines for JFM included (1) the procedures for constituting SFDA, FDAs and VFDCs/EDCs, (2) their duties and responsibilities, (3) methodology of preparing micro-plans, their effective implementation, and timely monitoring, (4) fund flow mechanism, and (5) disposal of forest produce and sharing of benefits.

For involving the local people in planning, implementation, and monitoring of schemes for forest management, one SFDA, 21 FDAs and 598 VFDCs/EDCs have been constituted in Mizoram. These committees i.e. VFDCs/EDCs have 2, 75,435 members belonging to 80,728 families. Memorandum of Understandings (MoUs) has been signed between SFDA and FDAs and also between various FDAs and VFDCs/EDCs.

Works under centrally sponsored scheme - "National Afforestation Programme" (NAP) - are mainly taken up by VFDCs/EDCs through FDAs. Revised operational guidelines for implementing NAP through JFM were issued in the year 2009 by the Ministry of Environment and Forests, Government of India. These guidelines were aimed at (1) strengthening institutional arrangements for project implementation (capacity building), (2) treatment of highly degraded lands (problem lands), (3) application of latest nursery and plantation techniques, (4) generation of additional sustainable income for members of VFDCs/EDCs through value addition to forest produce and linkage to better markets for forest-based products. The Government of Mizoram has adopted these revised guidelines by issuing notification in March, 2010.

The scheme - NAP - is being implemented effectively in Mizoram through the mechanism of JFM. Suitable tree species have been planted over an area of 57540 ha. under NAP during the period_2003-04 to 2013-14. These plantations are being protected through joint efforts of the local people and the Government agencies. It is expected that enrichment, protection, and sustainable management of the forests through JFM will provide substantial benefits to the local people while contributing significantly to ecological equilibrium and environmental stability.

1.4.2 Stakeholder's expectations

The local people particularly those living nearby forest areas expect sustainable livelihood support from the forests through extraction of permissible yield, value addition to forest produce and marketing of value-added products. They also expect to meet their needs for constructional timber at economical cost from the forests. However, they are also concerned for ecological stability in the region. Expectations of various stakeholders from the Environment and Forests department are given as under:-

		Table 1
Slno.	Name of Stakeholder	Expectations from the Department
1	The Indian citizens	a. Ecological balance and environmental stability.
	living in Mizoram	b. Bonafide forest-based needs - constructional timber, fuel wood,
	including the	and fodder – as per the Mizoram Forest Act,1955.
	indigenous people.	c. Constructive participation in afforestation, enrichment, and
		protection of forests.
		d. Easy access to information on uses and economic benefits of the
		forest products including Non-Timber Forest Products (NTFPs)
		and Medicinal Plants.
		e. Availability of technical know-how as well as other facilities for
		raising private plantations.
2	The State	a. Effective implementation of the planned schemes achieving the
	Government	desired outcomes.
		b. Satisfaction of the local people.
3	The Government of	a. Conservation of environment and forestry resources as envisaged
	India	in the National Forest Policy, 1988.
		b. Balance between conservation and development by
		implementing the provisions of the Forest (conservation) Act,
		1980 as well as other National and State acts and rules related to
		management of the forests and the wildlife.
4	The forest officials	a. Healthy working conditions.
	working in the State	b. Adequate facilities at par with our counterparts in other
		departments/services.
		c. Awards and recognition for good works.

5	Non-Government	a.	Increase in forest cover.
	Organizations	b. Enrichment and protection of the existing forests.	
	(NGOs)	c.	Preservation of wildlife by creating and maintaining healthy
			habitats for them.
		d.	Generating awareness towards the importance of forests and
			wildlife.
		e.	Eliciting active participation of public in conservation and
			protection efforts.
6.	Private tree/bamboo	a.	Technical knowhow.
	growers	b.	Logistic and financial support for raising and managing the
			plantations.
		c.	Mechanism to facilitate harvesting and transportation of timber
			and bamboos.

Accordingly, the Department of Environment & Forests, Government of Mizoram is committed to provide a variety of services, both tangible as well as intangible, to the citizens by scientifically managing the rich forest cover existing in the State. The tangible services include (1) arranging forest products of economic importance such as constructional timber, fodder, fuel-wood, sand, gravels etc. at reasonable costs, (2) offering gainful employment while implementing various schemes for enrichment and protection of the forests, (3) creating opportunities for additional income through the mechanism of "Joint Forest Management", (4) disseminating information on importance and economic benefits of the forests including Non-Timber Forest Products and medicinal plants, (5) building and maintaining eco-friendly recreation sites and trails, (6) making technical know-how available for raising and managing private forests/plantations, and (7) assisting private tree-growers in silvicultural harvesting and transporting of timber inside as well as outside the State. The intangible services include (1) stabilizing the climate, (2) enriching the soil fertility, (3) recharging ground water, (4) regulating the water flow, and (5) offsetting the air pollution.

1.5 Objectives for GIM implementation

Although the identified landscape (L-1) - the entire state of Mizoram - has a large area under forest cover, the forests are not rich in quality. About 67.70 % of the forest cover is open, having very less canopy density. A large extent of open forest, particularly in the hilly terrain, can have devastating impacts on the normal structure and the delicate interdependencies of diverse flora and fauna in the forest ecosystem. The

situation is likely to be further aggravated in Mizoram by the prevalence of shifting cultivation and other biotic interferences.

Efforts to enrich and protect the forests are being taken up by effectively implementing various schemes such as National Afforestation Programme, Integrated Forest Management, Thirteen Finance Commission Grants-in-Aid, National Bamboo Mission, New Land Use Policy etc. The local people are being encouraged to shift from shifting cultivation to settled agriculture by providing them technical and financial assistance.

The treatments being done to the landscape coupled with the proposed interventions under Green India Mission (GIM) will save the valuable hilly ecosystem of the State from deterioration. It is expected that implementation of proposed strategies will enhance the quality of existing forests, ecologically re-stock wastelands, improve eco-system services, increase forest-based livelihood income and augment annual CO₂ Sequestration.

1.6 Scope of implementing planned interventions under GIM

The GIM, which aims at providing sustainable livelihood support to the people in a stable ecosystem would be implemented initially in 51 villages of eight identified L2 landscapes. These villages form compact blocks for treatment in five Forest divisions/4 districts of the State. It is further planned to extend the mission in other parts of the State. It is to mention here that, the entire State has been identified as vulnerable i.e L1 landscape

Chapter 2

Details of Identified Landscapes

2.1 Criteria for selection of L1 Landscape

Criteria, which were adopted for identification of L1 landscape, are given below:-

2.2 Importance of L1 Landscape

Based upon the criteria given in para 2.2, the entire State of Mizoram (Area: 21,081 sq. km.) has been taken as L1 Landscape. Proper treatment of the landscape in the State would bring ecological security in the region and would also contribute significantly to stabilize the changing climate. The bio-geographical importance of the L1 landscape has been given in para 1.3.

2.3 Criteria for selecting L2 Landscape

Operational units (L2 level) have been identified based mainly on five indicators which are (1) extent of open forest, (2) dependency of the local population on the forests i.e. biotic pressure, (3) drainage pattern, (4) prevalence of shifting cultivation and (5) compact block for treatment under GIM. The criteria for selection of L2 Landscapes are given below in detail:

			Table 3

2.4 Reasons for selecting this L2 landscape among other possible L2 landscapes within L1:

A meeting (brainstorming session) of senior forest officers was held in March, 2012 to discuss various issues and formulate suitable strategies for the preparation of Bridge Plan/Perspective Plan under GIM. The views presented by the senior officers in the meeting are summarized below:

- The operational units should be from the districts which satisfy either of the two criteria i.e. extent of open forests or biotic pressure on the forests. Further, this unit should be strategically important for i) treatment and management of catchment areas and ii) engagement of the local people in settled agriculture or other sustainable livelihood options i.e weaning them away from jhum cultivation.
- The operational units, so selected, should form a compact block.
- The forest divisions, where activities similar to those proposed under GIM (KfW sponsored North East Climate Change Adaptation Programme) are being carried out, may not be taken up as operational units.
- Aizawl city, which carries maximum concentration of population (26% of the State's population),
 has the significant impact on the climate and the eco-system in the State. Therefore, forest-based
 interventions inside and outside the city of Aizawl may be taken up under GIM.

Considering the above views, it was decided in the meeting that 8 nos. of operational units in 5 forest divisions namely Darlawn, Champhai, Thenzawl, Kolasib, and Aizawl (for Aizawl division limited to inside and outside Aizawl city) may be taken in the initial five years of GIM. Other areas/divisions may be taken up subsequently under GIM.

The proposed landscape, Dumkhel ram lies across the inter-range boundary of Kolasib and Bairabi Forest Ranges in Kolasib forest division. The landscape consists of open and degraded forests, both Government and privately owned. There are many current and abandoned jhumlands as well. Further, it forms the catchment area of Tuichhuahen river which is the only source of water for Kolasib, one of the largest towns in the State. The treatments under Green India Mission would ensure continuous and uninterrupted supply of water for Kolasib town. As such, Dumkhel Ram was selected as L2 landscape for treatment under GIM.

2.5 Importance of L2 Landscape (Serlui hnar)

The identified landscape lies in the catchment area of Serlui river, the source of water supply to Serlui HEP(12MW), one of the most important HEP in Mizoram. Further and other Kolasib town. Treatment of this landscape under GIM would ensure regular water supply to 46,600 inhabitants (2011 census) living in Kolasib town. Well-stocked good-quality forests in "Bukpui & Kawnpui" landscape will also stabilize water flow in another major river of the region i.e. Serlui river flowing in north-west direction.

2.6 Criteria for selection of L3 landscape

All villages namely Lungmuat, Bukpui, & N Chaltlang, having interests in "Serlui hnar" have been taken as "Working Units" i.e. L3 landscape.

2.7 Importance of L3 landscape (N.Chaltlang)

The area under Village Council of N.Chaltlang is one of the five L3 landscapes (working units) identified for coverage in L2 landscape 'Serlui hnar". The N.Chaltlang village was established around the year 1891. It has the population of 1292 with 252 households (households under BPL category). The villagers are quite educated, literacy rate being 100%.

The total geographical area of this L3 landscape is 4275sqkm. In the past, most of the land was covered with well-stocked good-quality forests. However, the forests have suffered serious depletion and degradation due to traditional practice of shifting cultivation and uncontrolled felling of tress. As a result, presently, most of the areas are either wastelands or forests having very less canopy density i.e. less than 10%. It is expected that execution of well-planned strategies under GIM may result into ecological stability in the region.

Further, this L3 landscape controls water flow in several streams/rivers such as Serlui. These water-bodies are natural sources of water for Kolasib, N.Chaltlang and other nearby villages. The productivity of agricultural crops also depends upon water flow in these streams/rivers.

2.8 Extent of L1 landscape

Name of the L1 landscape: The entire State of Mizoram (map enclosed as annexure 'A')

Location of the landscape: State: Mizoram

District: All Districts

Forest Division: All Forest Divisions

Extent (area, boundaries, geo-references):

• Geographical area of the State is 21,087 sq. kms.

- The State shares its boundary with Assam and Manipur on the North, Myanmar on the East and the South, Tripura and Bangladesh on the West.
- It is located between 21°56' and 24°31' N latitude and 92°16' and 93°26' E longitude.

2.9 Extent of L3 landscape

Name of L3 landscape: Kawnpui & Bukpui (map enclosed as annexure 'B')

Location of the L3 Landscape: State: Mizoram, District: Kolasib, Division: Kolasib

Geo references of the L3 Landscape: 24°11'46" N & 92°40'46" E and

24°09"20" N & 92°38"16" E

Area of the landscape: Open forests : 118.81 sq. km.

Moderately dense : 41.55 sq. km.

Dense forests : 0.00 sq. km.

Scrub lands : 0.00 sq. km.

WRC : Nil

Horticulture : 10.19 sq km

Other areas : 24.44 sq. km.

Total area : 200.31 sq. km.

2.10 Extent and other features of L3 landscape (N.Chaltlang)

	Table 4
Location	The L3 Landscape (N.Chaltlang) is located along Aizawl-Bagha highway (NH-
	154). It is 73 kms. away from Kolasib town, district headquarter of Kolasib
	district, and about 50 kms. from Aizawl, the State capital.
GPS	1. N 24 ^o 2'0"'' E92 ^o 44'0" 2. N 23 ^o 59'0"'' & E92 ^o 44'0"
coordinates:	

Area	4275sqkm.			
Forest cover	Moderately dense forests –	17.64 sq. kms.		
	Open forests –	8.5 sq. kms.		
	Non-forests -	3.7 sq. kms.		
Forest type	Cachar Tropical Semi Evergi	reen Forest (2B/C2) mixed with bamboo breaks.		
	Important species found in	the locality are Terminalia chebula, Emblica		
	spps, Careya arorea etc. Dom	ninant bamboo species are Melocanna baccifera,		
	Dendrocalamus hamiltonii, Bar	mbusa tulda, D longispathus etc		
Soil quality	Three soil orders i.e. ultisols, in	nceptisols and entisols are found in the project area.		
	The surface soil textures are lo	oam to clay loam with clay content increasing with		
	depth in the hills whereas in the valleys it is mostly sandy loam to sandy clay			
	loams. The soils are acidic in nature with pH values ranging from 4.5 to 5.3. The			
	soils in the hills are strongly	acidic in reaction, whereas, the soils in alluvial		
	deposits are less acidic in na	ture. The percentage of organic carbon content is		
	medium (0.55 %).			
Topography	Some portion of the land is und	lulating with moderate slope i.e. 25° to 35°, whereas		
	most parts of the land are comp	paratively flat with an altitude of 800-900 mts. above		
	MSL.			

2.11 Profile of L3 Landscape (N.Chaltlang)

2.11.1 Population and Workers Population

The population data of N.Chaltlang village is given below in the following table:

				Table 5A
No of	Popu	lation	Children below	Total
Households	Adult Male	Adult Female	6yrs	
252	648	582	62	1292

The average family size is 5 persons per household.

Workers Population is as under:-

			Table 5B
Total Workers	Regular/Main Workers	Irregular/Marginal	Non Workers
		Workers	
Workers: 650	Regular Workers: 600	Irregular Workers: 42	NonWorkers: -
Male: 422			
Female: 228

7	Pumpkin	March	June	2
8	Calocasia (Bal)	April	Nov-Dec	2
9	Local pea (Behlawi)	March	Sept-Nov	4
10	Soya bean	June-July	Nov-Dec	2

2.11.11 Water Resource

There are three main sources of water for the people living in N.Chaltlang village i.e. water collection points connected to perennial fountains and rain water harvesting. Water connection from PHE department has many outlets for all villagers but house-to-house connection has not been provided. Rain water harvesting is being done by limited well-to-do families only.

2.11.12 Energy Consumption Pattern

The village has already been electrified by Power & Electricity department of the State. In addition, energy requirement is met from LPG connections, kerosene oil and fuel-wood collected from the Village Supply Reserves, the Jhumlands and the surrounding forests.

2.11.13 Demand for fuel-wood

The demand for fuelwood has been worked out based upon inputs received from NGOs,VC members and other villagers. The annual demand is as under:-

Average annual demand/household	No of households	Total annual demand of the village
3 cum	252	756 cum

The supply as per the carrying capacity of existing forest in L3 (N.Chaltlang) is expected as under:-

- A Total forest area: 2614 Ha
- B GS/Ha as per field work Survey Report: 19.612 cum
- C Total GS: 123550.71.cum
- D Annual Yield: 2471.014 cum
- E Fuel-wood availability assuming 30% of Annual Yield as fuel wood: 741.304 cum

2.11.14 Existing infrastructure

Anganwadi Centre (2 nos.), Primary School (2 no.), Middle School (1 no.), High School (1 no.), Community Hall (1 no.), Mini-Market (1 no.), Mini-Playground (1no.), Medical 1 (Health Sub center) and Govt. offices - Nil

Local Institutions / Organizations: - Village Council, YMA (1 Branch), MUP (1 unit), MHIP (1Branch) and Games & Sports Association (1no)

2.11.15 Problems and Priority

Through PRA exercise, problems being faced by the villagers could be ascertained. These are lack of proper medical facility, absence of link road to agricultural fields, incomplete net-work of approach roads within the village, in-sufficient supply of LPG cylinders and scarcity of water-supply.

2.12 Demographic statistics of L2 Landscape

					Table 16
S1.	Village	Forestry activities	Other activities	Livelihood	Any others
No.		proposed	like SMC	activities proposed	
1	N.Chaltlang	1)Enhancement of quality in existing forests (with limited root stock and open blanks) 2)Ecosystem restoration (Rehabilitati on of Shifting cultivation) 3)Agro forestry 4)Social forestry 5)Support to community conserved areas	Interventions in catchment areas of hydrological importance	Community livelihood enhancement.	Promoting alternate energy sources

2.15 Drivers of degradation and deterioration in the forest eco-system

		Table 17
Sl. No.	Village	Drivers of degradation
1	N.Chaltlang	Traditional practice of shifting cultivation, Lack of strategic and participatory land-use planning, excessive population pressure on the forests for fuel-wood, fodder, timber etc., inadequate scientific management of watersheds including rainwater harvesting.

Chapter 3

Process undertaken for preparation of Micro-Plan/Sub-Landscape Plan

3.1 Constitution of Micro-Plan Working Group

A meeting was held with members/representatives of Village Council for Lungmuat village, conservation-oriented NGOs (YMA, MHIP and MUP), forest officers and other prominent citizens of the village on 5th.9.2014. As per recommendations made in the meeting, a Micro-Plan Working Group was constituted for facilitating preparation of micro-plan for N.Chaltlang Landscape (L3). The constitution of the group is as under:-

Leader: Lalthanzuala, R.O

Members: 1) C.D.Lala VCP representative

2) Chalrohnuna YMA representative

3) Saihnuni MHIP representative

4) Lallianchhunga MUP representative

5) Ramlawma VFDC representative

A questionnaire was designed by the committee for collection of data on (1) demographic status, (2) socio-economic conditions of the villagers, (3) resources available in the village etc. The questionnaire was designed to facilitate (1) assessment of current land use pattern and formulation of proposed land use pattern, (2) participatory resource-based land-use planning, (3) identification of livelihood needs, (4) planning of activities for sustainable livelihood support to the people and ecological stability in the region. The members of the Working Group also visited the area covered under L3 landscape.

3.2 Participatory Rural Appraisal (PRA)

PRA exercise including group discussion, experience sharing, one to one discussion with the villagers etc. was conducted to promote people's participation in project planning, implementation and monitoring. Information on various issues concerning GIM implementation was explained to the villagers through interpretation of maps and other documents. Resource mapping, Preparation of existing land use map, seasonal Calendar (Cropping season) and wealth ranking exercise were completed during PRA activities. The principle of participatory land use planning was adopted with available technical inputs and in consultation with all the stakeholders including the local public, proposed land used map was prepared. The proposed land used map reflects the area where interventions are to be planned and implemented

3.3 Households survey

House-hold survey was carried out in the village covering almost all the families. A structured questionnaire was prepared for collecting information on dependency of every family on the forests as well as other required data.

3.4 Transect Walk

Transect walk was done by the Micro-plan Working Group along-with some local people and VFDC members. During transect walk, inputs were obtained from the field for deciding upon the suitability of the proposed land-use. GPS reading of the prominent sites/spots visited by the Working group were also recorded.

3.5 Details of awareness programmes, meetings and work-shops along-with the resolutions and other outcomes

					Table 18

			tourism activities	forests	

4.4 Objectives

Short term objectives

- Identification and arrest of drivers responsible for eco-system degradation
- Water-shed management ridge to valley approach
- Increase in fuel-wood and fodder availability
- Employment generation
- Awareness for sustainable management of natural resources

Long term objectives

- Sustainable livelihood support to the people
- Ecological stability in the region

4.5 Village-wise details of submissions proposed for treatment (Action plan)

Institutional Set-up for implementation in the landscape

6.1 GIM Committee:

Various committees have been constituted by the State government vide Notification No B.11016/16/2011-FST Dt:11/11/2014 for effective implementation of GIM in the State of Mizoram. A copy of notification is attached at Annexure-----

The names of these committees are as under:-

- 1) State Forest Development Agency for "Green India Mission"/State Mission Directorate
- 2) State Level Steering Committee for Green India Mission
- 3) GIM Cell under Environment & Forest Department/Nodal Agency
- 4) Revamped FDA for Green India Mission
- 5) District Level Steering Committee
- 6) Village Level GIM Committee

Chapter 7

Livelihood Issues

7.1 Brief note on the forest dependency and livelihood issues village-wise

7.1.1 Availability and Requirement of Fuel wood.

Most of the households use fuel-wood as supply of LPG cylinders is much limited in the rural areas. The requirement and availability of fuel-wood is indicated below:-

						Table 25
S1. No.	Village	No. of households	Average fuel wood requirement per household (cum.)	Annual Fuel wood requirement (cum.)	Fuel wood availability (Annual Yield) (cum.)	Remarks
1	N.Chaltlang	252	3cum	756 cum	2471.014	

7.1.2 Availability and Requirement of Fodder

Very few households practice cattle rearing for livelihood support. Therefore, demand for fodder is comparatively low.

7.1.3 Availability and requirement of Timber

Demand for timber used in house construction and furniture has been worked out and is indicated below:-

						Table 26
S1.	Village		Average			Remarks
No.		No. of	timber	Annual timber	Timber	
		house-	requirement	requirement	availability	
		holds	per household	(cum.)	(cum.)	
			(cum.)			
1	N.Chaltlang	252	0.65	163.8	491.4	

7.1.4 Availability and Requirement of NTFP(s).

Bamboo, cane, thatch, honey etc. are some of the important NTFP (s) which are extracted by the villagers from the forests. The demand as well as the availability for various NTFPS has been indicated below:-

N.Chaltlang Village:

							Table 27

Chapter 9

Status of reforms proposed

9.1 Role of Gram Sabha (Village Council) in project planning, implementation and monitoring Village level GIM committee has been constituted by the State Government vide notification No.B11016/16/2011-FST Dt 11.11.2014 (annexure-II) for the following activities:-

- 1. To render support in the preparation of Perspective Plan,
- 2. To ensure implementation of planned and approved schemes (approved by the State Level Steering Committee and MoEFCC) with expected level of quality,
- 3. To promote active people's participation in the implementation of "Green Indian Mission" and
- 4. To provide feedbacks timely to concerned authorities for further improvement in programme implementation.

Further, VFDC would play key rile in project planning, monitoring and implementation under GIM. Both the VFDC and the Village Level GIM Committee would work closely in coordination with Gram Sabha (Village Council).

9.2 Revamping of FDAs and SFDAs

SFDAs and FDAs (General Body as well as Executive Committee) have been revamped for formulating suitable plans and executing well-planned projects with people's participation under GIM in Mizoram. The SFDA (General Body) will provide overall guidance for effective implementation of "Green Indian Mission" in the State. It will also oversee implementation of the broad policy framework in achieving Mission goals and objectives. The Executive Committee of revamped SFDA has been entrusted with the following functions:

- 1. Approval of Perspective Plan as well as Annual Plan of Operations;
- 2. Preparation of annual reports on GIM implementation in the Sates;
- 3. Programmatic convergence at the landscape level

The revamped FDA (General Body) will deal with policy issues pertaining to cohesion and convergence of different programmes at the Panchayat/Village Council level for better outcomes from the

mission. The Executive Committee of revamped FDA will arrange for preparation of perspective plan/annual plan and convergence of various programmes.

9.3 FRAs compliance in areas covered under L2 and L3s

Claims for rights in the forests would be settled strictly as per the relevant acts applicable in the State of Mizoram

9.4 Easing out regulatory framework in felling and transportation of forest produce

There is need to simply the procedure for issuing documents enabling felling and transportation of forest produce. The MoEFCC has recently taken initiative for simplifying rules and procedures for issue of permits and transit passes in respect of trees grown on non-forest private lands. The State of Mizoram would work in this direction in a proper way to motivate tree planters on non-forest private lands and also protect the valuable forest wealth existing in the State.

9.5 Strengthening frontline formation of EF&CC department

Under Necessary actions would be taken for "Capacity Building" of frontline forest staff engaged in implementation of GIM in the State. Suitable training as well as required facilities would be provided to them for executing the planned works efficiently. It is expected that well-trained forest staff with people's participation would be able to deliver the desired output/outcomes GIM.

Chapter – 10

Mission Cost

10.1 Cost of the Mission

Year-wise cost of the mission for various work items has been given in the table place din Annexure –xi

10.2 Mission sustainability

The mission will be executed with active participation of the local people. On completion of the project, crop productivity of the existing forest will increase substantially. Sustainable extraction of forest produce, value addition to forest produce as well as marketing of value added products will provide livelihood support to the people while maintaining ecological stability in the region. Thus the mission is economically viable and socially adoptable.

MAP OF L1 LANDSCAPE MIZORAM

No.B. 11016/16/2011 - FST

Government of Mizoram

Environment and Forests Department

NOTIFICATION

Dated the 11st Nov' 2614

In the interest of public service, the Governor of Mizoram is pleased to constitute State
Forest Development Agency for "Green India Mission", State Level Steering Committee, GIM
Cell, Revamped FDA, District Level Steering Committee and Village Level Green India Mission
Committee for the State of Mizoram under Environment and Forests Department, Government of
Mizoram with immediate effect and until further order:-

A. State Forest Development Agency for "Green India Mission"/State Mission Directorate

General Body:

 Hon'ble Minister, Environment and Forests, Mizoram 	-	Chairperson
Principal Chief Conservator of Forests	-	Member Secretary
3. Chief Wildlife Warden	-	Member
4. Addl. Principal Chief Conservator of Forests	-	Member
5. Chief Conservator of Forests (Admn.)	~	Member
6. ✓ Chairman, Executive Committee, all FDAs		
7. Member-Secretary, Executive Committee, all FDAs	-	Member
8. Nodal Officer, State CAMPA	-	Member
9. Nodal Officer, Forest Conservation	-	Member
10. President, CYMA	-	Member
11. President, MUP Hqrs	-	Member
12. President, MHIP Hqrs	-	Member
13. Chief Conservator of Forests (P&D) & Nodal Officer,		
Green India Mission	-	Member

513/11 13/11 Pory

OFFICE OF THE CF (NC) MIZORAM

R. No. 1202

Date 13-11-19

File No.

Terms of reference:-

The State Mission Directorate (General Body) will meet at least once in a year. The Directorate will provide overall guidance for effective implementation of "Green India Mission" in the State. It will also oversee implementation of the broad policy framework in achieving Mission goals and objectives.

Executive Committee

Executive Committee		Chairperson
 Principal Chief Conservator of Forests 	-	\$30 mm A

11/11/14

Under Secretary to the Govt. of Mizoram, Environment & Forests Department

Minutes of the meeting (State Mission Directorate - GIM)

As per advisories/guidelines issued by the Ministry of Environment & Forests (MoEF), the State Government has constituted "State Mission Directorate" to suggest suitable strategies and provide necessary directions for implementing Green India Mission (GIM) effectively in Mizoram. The first meeting of the State Mission Directorate was held on 11.07.2014 in the Secretariat's Conference Hall. The meeting was chaired by Pu Lalrinmawia Ralte, Hon'ble Minister, Environment & Forest, Government of Mizoram and Chairman of the State Mission Directorate. The list of officers, who attended the meeting, is at the annexure.

Hon'ble Minister, Environment & Forests welcomed all members of the Mission Directorate and distinguished invitees for the meeting. He expressed that need-based planning under GIM and proper execution of well-planned projects will provide adequate livelihood support to the people while maintaining ecological stability in the State. He further stated that efforts to achieve environmental security will also contribute significantly to the process of arresting climate change and addressing its impact on the people.

Emphasizing upon the importance of GIM, Hon'ble Minister, Environment & Forests advised all concerned departments to work together and apply convergence principles so as to achieve mission outcomes/targets efficiently. He expressed that direct/up-front consultation with all stakeholders including village-based organizations, conservation-oriented NGOs and academic/technical experts would be required for designing scientifically-sound site-specific interventions aimed at getting sustainable delivery of maximum eco-system services from the forests. He further advised concerned officers of line departments to go through GIM guidelines and related documents carefully and suggest suitable results-oriented measures in larger public interests as per the mission guidelines for implementing GIM effectively in the State.

PCCF and Principal Secretary (E&F) emphasized upon the following issues of relevance concerned with planned implementation of GIM in his opening remarks:-

The State of Mizoram is also witnessing impacts of global climate change i.e. changing trends
in temperature and precipitation over the years. The "Green India Mission", which is one of
the eight missions under India's National Action Plan on Climate Change, is aimed at
addressing regional concerns of climate change thereby providing sustainable livelihood
support and creating healthy environment for the people.

- Micro-plan/perspective plan would be a tool to facilitate transition from vicious cycle
 (consisting of environmental degradation, decreased crops productivity, and poverty) to
 virtuous cycle leading to sustainable socio-economic prosperity in eco-friendly surroundings.
- Focus may be on restoration of degraded eco-system, water security, enhancement of crops
 (agricultural, horticultural and forests) productivity, energy security, value addition,
 marketing linkages for value-added produce etc.
- Training of educated youth for making them self-employable with sustainable use of available natural resources may be a viable option for livelihood support.

Thereafter, various matters concerned with planned implementation of the GIM in the State were discussed in detail and the following decisions were taken:-

Strategies for implementation of 'Bridge Plan' and preparation of 'Perspective Plan'

- All stakeholders including village communities, concerned/line departments in the district, conservation-oriented NGOs and academic/technical experts may be consulted for implementing "Bridge Plan" and preparing "Perspective Plan" for landscapes prioritized for treatment under GIM.
- As approved by the State Government, "Bridge Plan" may be implemented by following the
 fund transfer mechanism involving SFDA (State Forest Development Agency), FDAs (Forest
 Development Agencies) and VFDCs (Village Forest Development Committees). However,
 all concerned DFOs may obtain suitable inputs from various line departments in the district
 and other stakeholders for deciding specific work activities as per GIM guidelines/advisories.
- "Brigde Plan" may be executed strictly as per the approved items of works and as per the guidelines/advisories circulated by the MoEF for GIM implementation.
- While preparing perspective plan, needs of the local communities as well as existing site
 conditions such as agro-climatic zone, altitude, soil type etc. may be considered.
- "State Action Plan on Climate Change" prepared by the Science and Technology Department
 of the State may also be referred to for preparing "Perspective Plans".
- The concerned line departments may share their data/records with GIM cell for facilitating timely preparation of required perspective plans.
- Digitized maps i.e. geographical map, watershed map, contour map, land-use map, vegetation map etc. are required to be prepared for all L2 and L3. These maps would provide vital technical inputs for preparing micro-plans/perspective plans. For the purpose, MIRSAC

may submit proposal to GIM cell in PCCF's for sharing existing data and preparing addition vailability of relevant data, cost -- frame for providing required

GIM cell in PCCF's office, in consultation with lin _cpartments and other stakeholders, may prepare a model to work through convergence of all on-going schemes in identified landscapes as GIM cannot be a 'stand alone' project.

Modifications in constitution of various GIM committees

- Planning Department, Finance Department, AH & Vety. Department and Fisheries Department may also be included in the State Mission Directorate for GIM.
- All concerned DFOs i.e. DFO (Aizawl, Champhai, Kolasib, Darlawn and Thenzawl) may be included in GIM cell.
- In the Division Level GIM Committee, DC may be the Chairman and DFO Member-Secretary. Further, all line departments involved in GIM implementation at the district level and concerned ROs may be included as members of the division level committee.
- GIM cell in PCCF's office may prepare proposal for modifications in the GIM committees including ToR as per applicable guidelines and submit it to the State Government for approval.

State level workshop

The proposed 'State Level Workshop' on GIM may be held during 2nd week of August, 2014.

Other items

- Guideline on GIM in brief may be prepared in Mizo language for facilitating easy understanding by the local people.
- GIM cell in PCCF's office may provide copies of guidelines, advisories, Bridge Plans and other relevant documents to concerned line departments and other stakeholders for their knowledge and submission of suggestions on ways to implement GIM effectively in the state.
- Success/performance indicators as well as methods to measure these indicators may be developed in advance and incorporated in the "Perspective Plans".

In his concluding remarks, Pu Rosiama Vanchhawng, APCCF, emphasized upon the importance of GIM for the people of Mizoram. He expressed that the implementation of GIM in convergence with other on-going schemes would bring substantial benefits to the people in

(S9)

healthy environment. He requested all stake holders to work together so as to get maximum sustainable benefits from the mission.

MINUTES OF THE MEETING OF DISTRICT LEVEL STEERING COMMITTEE ON GREEN INDIA MISSION, KOLASIB DISTRICT

Venue

: Office chamber of Deputy Commissioner, Kolasib

Time

: Dt. 06.02.2015 - 2:00 PM

Members present: List appended.

The meeting was presided over by Pu Jitender Yadav, DC, Kolasib & Chairman of Kolasib District Level Steering Committee on Green India Mission. After welcoming the members, the chairman invited the Member Secretary to give the background information about Green India Mission and the purpose of the meeting.

Pu Lalthlamuana Pachuau, the Member Secretary then gave a brief background information about Green India Mission which is one of the eight missions for achieving the National Action Plan on Climate Change and how the mission has been launched and initiated in Mizoram. He informed that the District/Division Level GIM Committee meeting under the chairmanship of the DFO was held at Kolasib New Diakkawn Hall on 22.8.2014 and that Village level meeting on GIM has also been held at Serkhan, Bairabi, Thingdawl, Tumpui and Bualpui on 7.8.2015, 12.8.2015, 5.9.2014, 6.9.2014 and again on 5.9.2015 respectively. The District/Division Level GIM Committee initially constituted with DFO as chairman and ACF, ROs and local NGOs as members by the Government on 22.3.2012 has been modified and reconstituted as District Level Steering Committee on GIM with the DC as chairman and Heads of Offices of appropriate line Departments as members by the Government on 11.11.2014, and the terms of reference of the Committee is to provide for proper coordination among various departments and facilitate convergence of various programmes so as to achieve the outcome of Green India Mission efficiently.

The Committee was also informed that in Mizoram, Green India Mission is being implemented initially in four Districts, namely, Aizawl, Champhai, Serchhip and Kolasib districts and that two landscapes (L2) at Dumkhel ram and Serlui hnar under Kolasib District have been selected for treatment under GIM and villages (L3) involved are Thingdawl, Bualpui, New Diakkawn, Tumpui, Pangbalkawn, Meidum and Dilzau in Dumkhel ram landscape, and Kawnpui I, Zanlawn, Nisapui, N.Chaltlang and Bukpui in Serlui hnar landscape. Micro-plans for all these 12 villages have been prepared in consultation with the villagers/Village Forest Development Committees (VFDC) concerned. The Perspective Plans for the two landscapes have also been prepared by incorporating the micro-plans of all the 12 villages/VFDCs. This was followed by discussion on the following agenda item:-

Approval of convergence proposal of the Perspective Plan for L2 Landscapes under Kolasib District:

The Member Secretary informed that the purpose of the meeting is to discuss and approve the convergence proposal incorporated in the Perspective Plan for the selected landscapes (Project sites) in Kolasib District. The activities proposed under convergence by the Forest Department in consultation with the villagers and some of the line departments as given in chapter 5 of the Perspective Plan was circulated among the members and after thorough deliberation and inclusion of fresh proposals from other line Departments, the Committee approved the activities proposed under convergence as modified and entered in chapter 5 of the Perspective Plan for the two landscapes at Dumkhel ram and Serlui hnar under Kolasib District.

The meeting ended with vote of thanks from the chair.
